#02 BK - Impression that there was a document that was at the DITE that is missing & they think it's somewhere else & are looking for it.

Structure

brownish  
grey

mosaic

Ex 1/2 "like" a house. Some however of other than residents are  
- "like" an office a HQ or etc. in a converted dwelling  
place. Sense of being brownish-grey stone construction  
on a slight elevation above a street curving along a  
slight slope contour with fence around it & steps  
leading to a door. 2 floors - other parts to  
structures. Internal activities are not visible  
to this level. It's "like" it's part of a large  
federation/organization/agency - group of people bound  
by common purpose & goal but more constraints  
than just voluntary

See 1/2 inside beltway, not new construction

object

See 1/2 rounded, metal, thin-walled object secured to ceiling - I.E. overhead people go past + under it. Inside a structure

Seems to have sensors to do with President

7

rounded, metal, thin walled object secured to ceiling - people go by and under.
